

## THE SOLUTION FOR KEEPING CASES SEALED DURING DISTRIBUTION

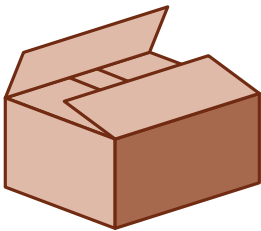

The RPS-LR Automatic Case Sealer closes and seals RSC cases at the end of the line using controlled, repeatable motion. It runs a wide range of case sizes through automatic changeovers and keeps seals closed even when case quality varies.

### Key Features:

- Largest case size range in the industry
- Fully automated, push-button case changeover with servo control
- Servo-driven motion for major flap opening and folding
- Available in hot melt or tape sealing configurations

### Case Styles:

**Regular Slotted Container (RSC)**

### Specifications:

- Automatic top sealer for RSC case styles
- Handles case sizes from 5" x 6" x 4" up to 25" x 20" x 20"
- Automated changeovers are completed in approximately 20 seconds
- Supports a wide range of case sizes within a single production run
- Designed for high-speed end-of-line sealing applications
