

FAST, FLEXIBLE BOX SETUP WITH ONE-TOUCH CHANGEOVERS

Production demands are shifting fast, and your equipment needs to keep up. The WLRV-CE is built for change, with servo-driven automation that adapts to new case sizes and formats in minutes. It's the only machine in its class that handles left- and right-hand RSC and HSC cases, with recipe-based controls that eliminate manual adjustments.

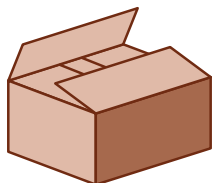

Specifications:

- Intermittent motion system for reliable box control
- Centralized maintenance and sensor-ready design
- Lexan doors, brake locks, and emergency stops, configurable to any required safety performance level and category (e.g., CAT3), for enhanced safety.
- Cases formed and discharged standing upright

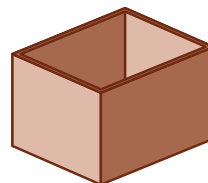

Key Features:

- Runs RSC and HSC boxes in both left- and right-hand formats
- Sub five-minute servo-driven case changeovers with HMI control
- Handles case sizes from 6"x6"x4" up to 24.5"x20"x20"
- Includes KeyGuard Control™ for secure operator access

Case types (if applicable): Regular Slotted Container (RSC), Half Slotted Container (HSC)

Regular Slotted Container (RSC)

Half Slotted Container (HSC)
