

## FAST TRAY FORMING BUILT FOR CHANGING PRODUCTION NEEDS

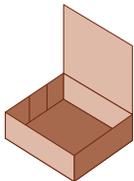

The TR-50 handles up to 50 trays per minute and supports bakeable corrugated trays, beverage trays, and multiple slotted configurations used across production lines. Its servo pick-and-place motion provides controlled sheet handling, helping your line maintain consistent results as materials or production requirements change.

### Key Features:

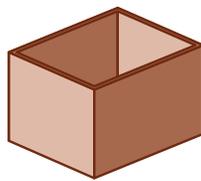

- Servo pick-and-place design for stable sheet movement
- Heavy-duty frame design for consistent tray quality over long runs
- Toolless changeovers for quick size adjustments
- Open access and clear sightlines for fast checks and cleaning
- Produces up to 50 trays per minute in various corrugated and slotted formats
- Safety-rated brakes lock the position whenever the machine stops
- Fully welded structural steel frame built for demanding environments
- Lexan guarding with anti-intrusion switches preserves visibility
- Remote emergency and cycle stop stations placed for quick access

### Specifications:

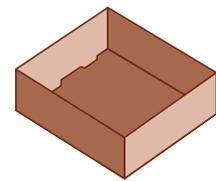

### Case Styles:

**Lidded End Slotted  
(inside or outside)**

**Side Slotted  
(inside or outside)**

**Standard FOIL  
Trays**

**Snap the QR Code  
with your camera**
