

FAST, ACCURATE FOIL TRAY FORMING FOR HIGH-DEMAND OPERATIONS

The TR-60 Fold Over Interlocking (FOIL) Tray Former produces up to 60 FOIL trays per minute for food processing, pharmaceutical, and other high-demand production lines running full- and half-sheet formats. Its mechanical pick-and-place system maintains controlled sheet handling from pickup through placement, helping keep output consistent even when material varies.

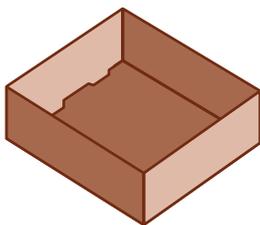

Key Features:

- Mechanical pick-and-place to hold each sheet firmly at speed
- Pre-breaker design for reliable folding of interlocking flaps
- Clear sightlines and open access for quick adjustments
- Designed for steady performance through heavy daily workloads

Specifications:

- **Speed:** Up to 60 FOIL trays per minute
- **Tray formats:** Full-sheet and half-sheet
- **Frame:** MIG-welded rectangular steel
- **Safety:** Lexan guarding and remote emergency stops

Case Styles:

Standard FOIL Trays
